

Going Long on Temperature

Simon Crase

27 October 2016

Idea

Many people do not accept that global are rising. While some of them are naïve, others are shrewd investors. I wondered what would happen if these folk thought about the temperature the way they think of investments.

The Sharpe Ratio is an important tool for judging a stock: $\frac{\mu}{\sigma}$

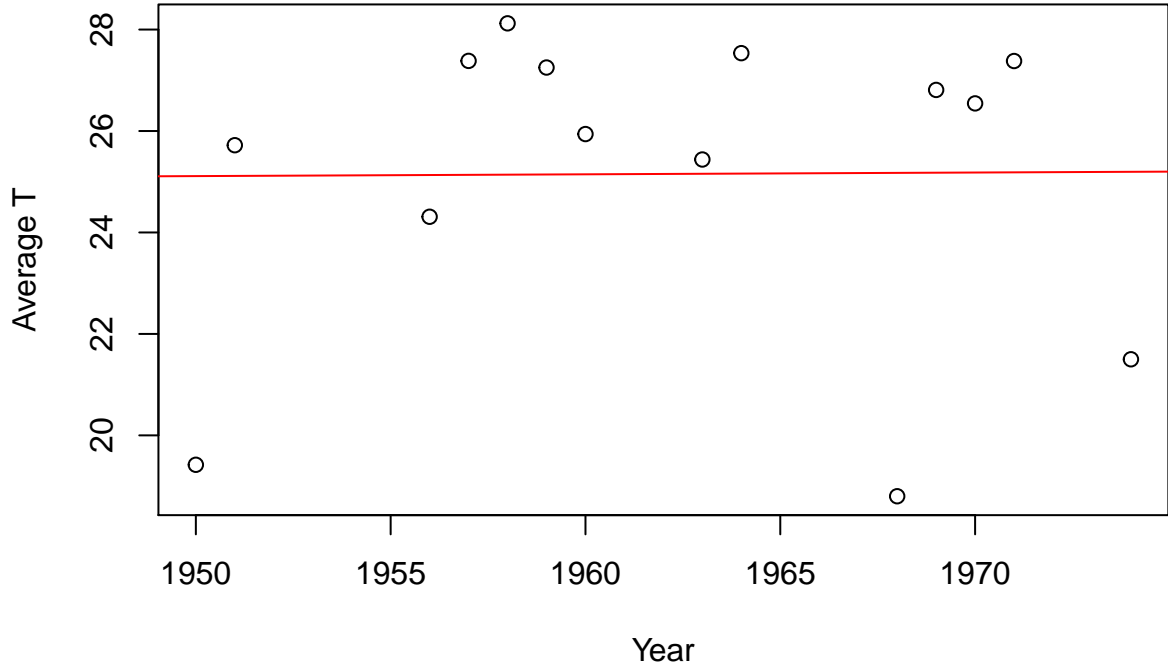

Methodology

- Select stations at random

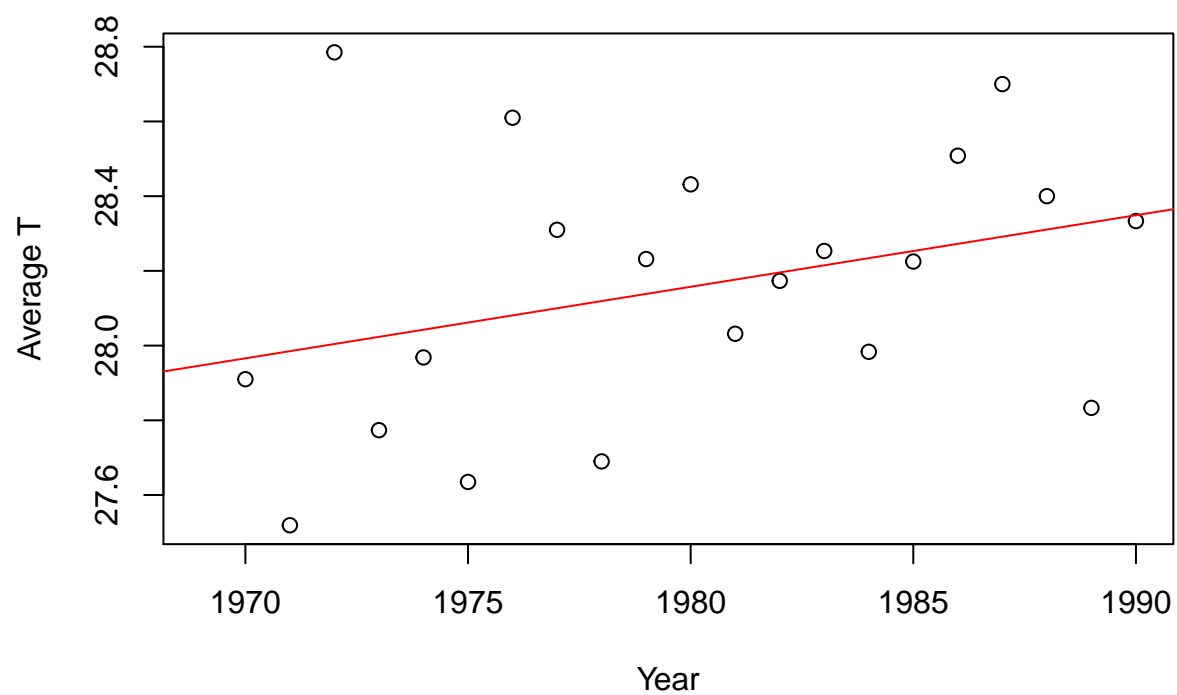

Results

ID	NAME	LATITUDE	LONGITUDE
21941781001	LASBELLA	26.23	66.32
